

Epson C3500

Epson C7500

Epson C831

CREATE YOUR print station and boost your workflow.

Do you own an Epson ColorWorks C3500, C7500 or C831?

Thanks to a collaboration with Epson, D.P.R. has created a dedicated product line.

The freedom to build the configuration that better fits your needs.

Making their world premiere are D.P.R. brand new matrix remover for the C7500 and slit for the C831.

All products specific for use with Epson ColorWorks line are meant to improve your turnaround for label production.

In order to guarantee a perfectly aligned media path, specific baseplates which easily accommodate the Epson ColorWorks printers are available and you will benefit from your own in-house printing solution.

Why D.P.R. product line for Epson ColorWorks printers is a must-have

1. You can print roll-to-roll without concerns about compromising label quality. Everything is all kept in line, neat and perfectly aligned.
2. Use large size rolls with your Epson color label printers by adding our unwinders and rewinders to your printer. A great way to improve the efficiency of your color label printing operation.
3. Print small to large format labels roll-to-roll and print from a roll for immediate presentation.
4. All D.P.R. products are manufactured in Italy using industrial motors and industrial steel frames. These are designed to provide many years of service.
